

## Human Papilloma Virus Vaccination

Year 8 (Boys and Girls) and all Year 9's that missed the 1<sup>st</sup> dose

School: Ernulf Academy

### The date of your Immunisation Session:

**Monday 18<sup>th</sup> January 2021 for year 9 and Friday 19<sup>th</sup> March for year 8**

**Please email the information to all parents of Year 8 Boys and Girls and all Year 9's that missed the 1<sup>st</sup> dose last year**

The **portal** will close on:

**31<sup>st</sup> December 2020**

To enable the smooth running of the session, with as little disruption to your school day as possible, please:

- Email the HPV parent information out as soon possible
- Provide a suitable **location** for the immunisations to take place (eg School hall, classroom or library). We will require desk space for working on laptops.
- Please prepare for us to be with you **all day**; our aim is for the children to be out of their class for as short a period as possible. We do appreciate that space is at a premium, and we understand if our staff need to clear up for lunch. If our staff could have a break in your staff room that would be really appreciated.
- In order for the session to run as smoothly as possible and to help prevent the risk of errors, we will access children's health records during the immunisation session. Please could you let us know if there are any problems in accessing the internet at your school and whether you are able to share your **wifi** password with us in advance?
- If you have students who need information in other **languages**, please contact us:

**0300 555 5055**
